WARNING!

MAY CAUSE ADVERSE REPRODUCTIVE EFFECTS, - SUCH AS INFERTILITY BASED ON ANIMAL DATA
MOLTEN MATERIAL WILL PRODUCE THERMAL BURNS

SECTION 3: Composition/information on ingredients

3.1 / 3.2 Substances / Mixtures

General Information:

Chemical name	Concentration	Additional Identification	Notes
Polystyrene - Low MW	100%	CAS-No.: 9003-53-6	

* All concentrations are percent by weight unless ingredient is a gas. Gas concentrations are in percent by volume.

This substance has workplace exposure limit(s).

PBT: persistent, bioaccumulative and toxic substance.

vPvB: very persistent and very bioaccumulative substance.

SECTION 4: First aid measures

4.1 Description of first aid measures

- Inhalation:** Move to fresh air. Treat symptomatically. Get medical attention if symptoms persist.
- Eye contact:** Any material that contacts the eye should be washed out immediately with water. If easy to do, remove contact lenses. Get medical attention if symptoms persist. If molten material contacts the eye, immediately flush with plenty of water for at least 15 minutes. Get medical attention immediately.
- Skin contact:** Wash with soap and water. Get medical attention if symptoms occur. If burned by contact with hot material, cool molten material adhering to skin as quickly as possible with water, and see a physician for removal of adhering material and treatment of burn. Get medical attention.
- Ingestion:** Seek medical advice.

4.2 Most important symptoms and effects, both acute and delayed:

Burns should be treated as thermal burns. The material will come off as healing occurs; therefore, immediate removal from the skin is not necessary. Symptoms may be delayed.

4.3 Indication of any immediate medical attention and special treatment needed

- Hazards:** Contact with molten substance/product may cause severe burns to skin and eyes.
- Treatment:** Treat symptomatically.

SECTION 5: Firefighting measures

- General fire hazards:** Material can accumulate static charges which may cause an electrical spark (ignition source). Use proper bonding and/or grounding procedures.

5.1 Extinguishing media

- Suitable extinguishing media:** Water spray. Dry chemical. Carbon Dioxide.

- Unsuitable extinguishing media:** None known.

5.2 Special hazards arising from the substance or mixture:

Powdered material may form explosive dust-air mixtures.

5.3 Advice for firefighters

- Special Fire Fighting Procedures:** Minimize dust generation and accumulation.

- Special protective equipment for fire-fighters:** Self-contained breathing apparatus and full protective clothing must be worn in case of fire.

SECTION 6: Accidental release measures

- 6.1 Personal precautions, protective equipment and emergency procedures:** Wear appropriate personal protective equipment.
- 6.2 Environmental precautions:** Not regarded as dangerous for the environment.
- 6.3 Methods and material for containment and cleaning up:** Sweep up and place in a clearly labeled container for chemical waste.
- Notification Procedures:** In the event of a spill or accidental release, notify relevant authorities in accordance with all applicable regulations.

SECTION 7: Handling and storage:

- 7.1 Precautions for safe handling:** Avoid contact with molten material. Do not taste or swallow. Wash thoroughly after handling.
- 7.2 Conditions for safe storage, including any incompatibilities:** Keep container closed. Keep away from food, drink and animal feedingstuffs.
- 7.3 Specific end use(s):** Adhesive Plastic additive Coatings

SECTION 8: Exposure controls/personal protection

8.1 Control parameters
Occupational exposure limits

If exposure limits have not been established, maintain airborne levels to an acceptable level.

8.2 Exposure controls

Appropriate engineering controls:

Good general ventilation (typically 10 air changes per hour) should be used. Ventilation rates should be matched to conditions. If applicable, use process enclosures, local exhaust ventilation, or other engineering controls to maintain airborne levels below recommended exposure limits. If exposure limits have not been established, maintain airborne levels to an acceptable level.

Individual protection measures, such as personal protective equipment

General information: Eye bath, Washing facilities.

Eye/face protection: It is a good industrial hygiene practice to minimize eye contact. Wear a face shield when working with molten material.

Skin protection**Hand protection:**

It is a good industrial hygiene practice to minimize skin contact. When material is heated, wear gloves to protect against thermal burns.

Other:

No data available.

Respiratory Protection:

If engineering controls do not maintain airborne concentrations below recommended exposure limits (where applicable) or to an acceptable level (In countries where exposure limits have not been established), an approved respirator must be worn. In the United States of America, if respirators are used, a program should be instituted to assure compliance with OSHA Standard 63 FR 1152, January 8, 1998. Respirator type: Air-purifying respirator with an appropriate, government approved (where applicable), air-purifying filter, cartridge or canister. Contact health and safety professional or manufacturer for specific information.

Hygiene measures:

Observe good industrial hygiene practices.
