1. PRODUCT AND COMPANY IDENTIFICATION

POLYONE CORPORATION 33587 Walker Road, Avon Lake, OH 44012

NON-EMERGENCY

TELEPHONE

Product Stewardship (440)-930-1395

Emergency telephone

CHEMTREC 1-800-424-9300 (24hrs for spill, lenk, fire, exposure

number

or accident).

Product name

GEON VINYL RESIN

Product number Chemical Name

Ethene, chloro-, homopolymer

CAS-No.

9002-86-2

Product Use

Industrial Applications

2. COMPOSITION/INFORMATION ON HAZARDOUS INGREDIENTS

There are no known hazardous components above regulatory thresholds in this product.

3. HAZARDS IDENTIFICATION

EMERGENCY OVERVIEW

This product may contain residual vinyl chloride monomer (VCM) (CAS number 75-01-4) below 8.5 ppm (0.00085%). OSHA considers VCM a suspect carcinogen and regulates it under 29 CFR 1910.1017. It is unlikely, under normal working conditions with adequate ventilation, that the OSHA action level and exposure limits will be exceeded for residual VCM. However, the user should take the necessary precautions (e.g. mechanical ventilation, local exhaust ventilation, air-monitoring, respiratory protection, etc.) to ensure airborns levels of any vapors including VCM or dusts that may be released during heating or processing are below regulated levels.

POTENTIAL HEALTH EFFECTS

Routes of Exposure:

: Inhalation, Ingestion

Acute exposure

Inhalation

. Resin particles, like other thert materials, can be mochanically initiating. At process temperatures, product emissions may cause

irritation.

Ingestion

Eyes

; No adverse health effects are anticipated.

: Particulates like other than materials can be mechanically irritating. At process temperatures, product emissions may cause irritation.

Skin

: Experience shows no unusual dermatitis hazard from routine handling.

Version Number 1.0

Print Date 7/15/2003

Revision Date 06/26/2003

Chronic exposure

: Refer to Section 11 for Toxicological Information.

Medical Conditions Aggravated by Exposure: : None knawn.

4. FIRST AID MEASURES

Inhalation

: Move to fresh air in case of accidental inhalation of dust or fumes from overheating or combustion. When symptoms persist or in all cases of doubt seek medical advice.

Ingestion

: Not an anticipated hazard.

Eyes

Rinso immediately with plenty of water, also under the eyelids, for at least 15 minutes. If eye irritation persists, seek medical attention.

되네고

Wash off with soap and plenty of water. If skin irritation persists seek medical attention.

5. Fire-fighting measures

Flash point

; 736 °F ASTM D1929

Flammable Limits

Upper explosion limit Lower explosion limit : Not applicable Not applicable

Autoignition temperature

Not relevant

Suitable extinguishing media

Water spray, dry powder, foam, carbon dioxide (CO2).

Special Fire Fighting

Procedures

Fullface self-contained breathing apparatus (SCBA) used in positive pressure mode should be worn to prevent inhalation of airborne contaminants.

Unusual Fire/Explosion Hazarda

The solld polymer can only be burned with difficulty. Fires will tend to self-extinguish in the absence of a substantial external source of heat or flame, Hydrogen Chloride (HCl) is generated upon product combustion. Prompt cleaning of surfaces with water based detergents is indicated after a fire to minimize corrosive attack. Vinyl resin dust has a very low tendency to explode. The minimum ignition energy for viny) resin dust clouds is much higher than that of natural materials such as starch and flour or of other plastic muterials. However, as with any powder material, care should be taken to avoid energion of dust clouds and to minimize ignition sources.

6. ACCIDENTAL RELEASE MEASURES

Personal precautions

West appropriate personal protection during cleanup, such asimpervious gloves, books and coveralls. Material can create slippery conditions.

Environmental pressutions

Should not be released into the environment. The product should not be allowed to enter drains, water courses or the soil.

GEON VINYL RESIN Page 3 of 6 Version Number 1.0 Print Date 7/15/2003 Revision Date 06/26/2003 Clean up promptly by sweeping or vacuum. Package all material in Methods for cleaning up appropriate container for disposal. Refer to Section 13 of this MSDS for proper disposal methods. 7. HANDLING AND STORAGE : Take measures to prevent the build up of static electricity. Use only Handling in area provided with appropriate exhaust ventilation. Material can ን create slippery conditions. : Keep containers dry and tightly closed to avoid moisture abaptation Storage and contamination. 8. EXPOSURE CONTROLS / PERSONAL PROTECTION : Under normal handling conditions a respirator may not be required. Respiratory protection If dusty conditions occur wear appropriate respiratory protection. : Safety glasses with aide-shields. Eye/Face Protection : Protective gloves. Hand protection Skin and body protection : Long sleaved clothing. Safety shoes. Additional Protective Measures : Handle in accordance with good industrial hygiene and safety General Hygiene Considerations practice. Wash hands before breaks and at the end of workday. ; Heat only in areas with appropriate exhaust ventilation. Provide Engineering measures appropriate exhaust ventilation at machinery. Exposure (imit(s) There are no known hazardous companents above regulatory thresholds in this product. 9. PHYSICAL AND CHEMICAL PROPERTIES ! Not applicable. Form : Salid Busporation rate powder, granular Spacific Gravity : Not determined Appentance . WHITE Bulk density Color : 20 to 25 lbs/ft3 : Yery faint Vapor pressure : Not applicable Одот Melting pointrange : Not extablished Vapor density : Not applicable Boiling Point: : Not applicable рH : Not applicable Water solubility : Insoluble 10. STABILITY AND REACTIVITY

POLYONE CORPORATION

PolyOne.

MATERIAL SAFETY DATA SHEET

GEON VINYL RESIM

Version Number 1.0 Revision Date 06/26/2003 Page 4 of 6 Print Date 7/15/2003

Stability

: Stable,

Hazardous Polymerization

: Will not occur.

Conditions to avoid

To avoid thermal decomposition, do not overheat. Keep away from

oxidizing agents and open flame.

Incompatible Materials

: Avoid contact with strong oxidizers. Also, avoid contact with accept or acetal copolymers and with amine containing materials during processing. At processing conditions, these materials are mutually destructive and involve rapid degradation. Thoroughly purge and mechanically clean processing equipment to avoid even trace quantities of these materials from coming in contact with each other.

Prevent cross contamination of feedstocks.

Hazardous decomposition products

Carbon dioxide (CO2), carbon monoxide (CO), oxides of nitrogen (NOx), other hazardous materials, and smoke are all possible.

Prolonged heating (approximately 30 minutes or more) above 392 °F (200 °C) or short term heating at 482 °F (250 °C) may result in product decomposition and evolution of carbon monoxide and

hydrogen chloride.

11. TOXICOLOGICAL INFORMATION

There are no known hazardous components above regulatory thresholds in this product,

12. ECOLOGICAL INFORMATION

Persistence and degradability

: Not readily biodegradable.

Environmental Toxicity

: Adverse ecological impact is not known or expected under normal

use.

Bioaccumulation Potential

: Does not bioaccumulate.

Additional advice

: No data available.

13. DISPOSAL CONSIDERATIONS

Product

: Where possible, recycling is preferred to disposal or incineration. The generator of waste material has the responsibility for proper waste classification, transportation and disposal in accordance with applicable federal, state/provincial and local regulations.

Contaminated packaging

: Recycling is preferred when possible. The generator of waste material has the responsibility for proper waste classification, transportation and disposal in accordance with applicable federal, state/provincial and local regulations.

14. TRANSPORT INFORMATION

16. OTHER INFORMATION

The information provided in this Safety Data Sheet is correct to the best of our knowledge, information and belief at the date of its publication. The information given is designed only as a guidance for safe handling, use, processing, storage, transportation, disposal and release and is not to be considered a warranty or quality specification. The information relates only to the specific material designated and may not be valid for such material used in combination with any other materials or in any process, unless specified in the text.
